LIVING PROOF CALIFORNIA

**AN AVERAGE OF 100 SURRENDER TO JESUS
EVERY NIGHT. WHY SO MANY YOUNG MEN?**

For their safety's sake I cannot give you their names or even show you a picture. They wept their way to Jesus. They are skin heads. Hitler is tattooed on the side of their head. They are not the only ones being saved. Young people from every race and background are coming for new life.

In our tent an average of 100 souls per night surrender to Jesus. But the amazing thing is who the majority of them are—they are young men! The trend began in our first tent crusade and grew more obvious in city after city.

Look at the pictures. The altars are filled with young men. Night after night it is the same. Why are so many young men coming to Christ in our California meetings? Here are some clues...

The radical left routinely attacks them. The left has targeted them, alienated them and in the process made them susceptible to Christ. They have inadvertently planted the seeds of revival in California. Will young men charge into the Kingdom and discover what it means to be a son of God and a man of God. I know so!

If you want to invoke the rage of the left just say something positive about young men—especially white young men. But their wrath is not just for whites. When black young men try to think for themselves and refuse to mouth the mantra of the Left, they are vilified.

"Toxic masculinity" is a phrase used to justify oppression and the exile of young men. They are deliberately targeted for the

sake of "progress." Many of them wander aimlessly being shunned and stepped over in the leftist agenda. Radical feminists ridicule them. Colleges persecute them. Cultural mores are stacked against them. Every mom who is raising a son today knows exactly what I am talking about.

Richard Vedder a professor of Economics from Ohio University says, "Men are vastly outnumbered in America's universities—in the fall of 2016, there were 2,667,000 more women studying than men. Not only are they significantly outnumbered, men are often disproportionately harshly treated in campus disciplinary actions, often being denied rights routinely and constitutionally provided all Americans off campus."

In a shockingly biased article, Washington Post writer Christine Emba, seems to want to deny young men hope. She even said it was sad that young men were finding hope in the lectures of Jordan Peterson. She even called the article ***The profound sadness of the Jordan Peterson phenomenon.***

She said, "Peterson himself will tell you that serving as a father figure is his heaviest burden. Much of his work is dedicated to pushing a generation of confused youths to build character, put their lives in order, become adults." "I want to talk to you about how people exist in the world," he told those in attendance last week. And that's what this tour is all about. It is also what makes it profoundly depressing."

How can she find it "profoundly depressing" that young men are finding hope and direction?

Our way of life is being systematically discarded in

California. Each day I understand more what God is doing among us. Haman was hanged on the gallows he had built for righteous Mordecai. Satan has chosen to hang America on the gallows of California's radical left and the agenda of disenfranchising young men, but God is working to make it backfire.

These young men are a catalyst to revival. I know that as the tent travels south on Highway 99 we will see a snowball effect—an army of young men is being born. Psalm 118: 23 says, *"This was the Lord's doing; it is marvelous in our eyes."*

Of course, we want all of our daughters saved too! We rejoice over the young women who are being radically saved in the tent.

The tent has moved to a new city. You can't imagine where: an American city that was totally destroyed. At this hour, our tent is headed to Paradise California. Some are saying it can't be rebuilt. But I know better. I had lunch with 50 Pastors and leaders from that community and they are amazing! Their determination is astounding!

It would be just like Jesus to give them beauty for ashes. This is a once-in-a-lifetime opportunity to see a restored in heart and spirit before it is physically rebuilt.

They invited me here. I come as a servant not a celebrity. I am honored and humbled to work alongside them.

Now I must give you the biggest announcement yet: May 28-31st we are bringing Living Proof to Stockton California.

No city in America has been more devastated than Stockton California. It tops the lists of so many tragic conditions. Crime, gangs, violence, addiction and homelessness are rampant here. It is a city that Satan has driven into despair.

We are coming to Stockton full of the power of God—the wisdom of God—the people of God, and the WORD OF GOD! This city sits on the 99—the corridor of glory—and we will harvest souls.

I believe Stockton will be the largest tent meeting in our history. The biggest army of workers we've

ever had will converge on this city. This is the city where I had the dream about highway 99 turning into a river of healing. What we will see here will dwarf anything we have seen so far.

But the biggest part of the biggest news is where the tent

will stand. We have obtained the most visible and prestigious location in the city of Stockton: The Weber Point Event Center. Truly our God means to make a bold statement in Stockton.

I need you to pray. God wants to save thousands in Stockton. I need you to alert everyone you know in the greater Stockton area that we are coming. When you pray, pray for the safety of our workers. Pray for amazing favor from the city. Pray for the finances we need for what will surely be the most expensive tent outreach by far.

Precious partner please hear my heart...we are on the march. The glory has come. The crowds are responding. The moment we have been waiting for has come. The miraculous dream has become a glorious reality.
